

Carbon Reduction Plan Template

Supplier name: Midland Foods Ltd.

Publication date: 27/05/2025

Commitment to achieving Net Zero

Midland Foods Ltd is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024 (May 2024 – April 2025)	
Additional Details relating to the Baseline Emissions calculations.	
<i>Baseline scopes include, Scope 1; Gas, Scope 2; Electric, Scope 3; Travel.</i>	
<i>Baseline has been reanalysed from May 2024-April 2025, to provide 12-month data analysis.</i>	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	1,193.03 tCO ₂ e
Scope 2	2.81 tCO ₂ e
Scope 3 (Included Sources)	124.75 tCO ₂ e
Total Emissions	126.5 tCO ₂ e

Current Emissions Reporting

Reporting Year: 2026 – This will be reported once another 12 months' worth of data is collected.	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	XX
Scope 2	XX
Scope 3 (Included Sources)	XX
Total Emissions	XX

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

- Next 6 years to 2030: Target of 25% Carbon reduction
- Period to 2040: Target of 50% Carbon reduction
- Period to 2050: Target of 100% Carbon reduction to Net Zero

These are ambitious targets, with a steep initial reduction, but this ambition is deliberate as we recognise the urgency associated with the need to reduce carbon outputs. A lot of the proposed measures in the Projects & Initiatives section can be introduced or invested in by the first milestone of 2030.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects will be enforced since because of the 2024 baseline. We are unable to provide carbon emission figures, due to this being a baseline submission. However, this will be done on our next Carbon Reduction Plan submission.

Scope 1 (Gas) Actions

- Over a long timescale, there may be potential to change the boilers at Midland Foods from natural gas to an alternative lower carbon fuel type such as Biomass.

Scope 2 (Electricity) Actions

- Implement all available technical solutions, including hardware and software building and energy management systems
- Ensure we have power management policies in place for hardware such as laptops / PC / printers etc
- Encourage behavioural change through publishing internally a dashboard of carbon output/energy consumption by office location
- Maximise purchase of renewable-backed energy tariffs as per latest guidance
- We have implemented timed lighting through the production unit, to prevent any electric wastage.

Scope 3 (Travel) Actions

- Introduce a fleet of electric vehicles to move away from non-renewable energy sourced vehicles.
- Ensure vehicles are meeting emission requirements.
- Over time vehicles should be replaced to ensure they are meeting energy efficiency requirements.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
